

Compliance Document for Mini Storage Builders

The purpose of the compliance document is to provide Building Outlet Corporation the necessary contact information to help insure that upon placing an order, your building design will comply with the design requirements specified and governed by your building department. This does not include local zoning issues, which are separate from the design of the components themselves.

You can fill out this form online, print it, and fax it to (303) 904-7105 or save it on your computer and email it as an attachment to info@ministorageoutlet.com

Please provide the following building site, contact and design information:
